

# AEA SPEAKS

## NEWSLETTER-NOVEMBER EDITION

**A** pioneer in education once said, "Creativity is as important now in education as literacy and we should treat it with the same status." It's truly quoted that investing in knowledge pays you the best interest.

Anchorwala Education Academy took birth with a mission to provide educational service with continuous learning in a child-friendly environment. Our aim has always been to cater to the holistic development of every child. Standing out from the conventional system, we groom students for the future. We can proudly say that we have been successful in offering the best educational services including e-library, coding and robotics, mass media and communications touching all spears of knowledge.

Unleashing the creative and literary skills, we release the first edition of our school newsletter as an ode to our beloved and respected late Hon. CEO Shri. Vilas Pravinchandra Kenia who always wished the best for the academic, social and emotional growth of students. He had his heart in school. He inspired the staff and students to explore beyond textbooks.

"AEA Speaks" is an initiative to cultivate and encourage the literary and artistic skills of the students. It is a way to showcase the budding talents and also an extended form of learning. This edition presents the content contributed by teachers and students of Grade 9 and 10. We motivate all the students to actively participate in co-curricular activities, competitions and events that will help to nourish and upskill your capabilities.

## HIGHLIGHTS OF THE PAST MONTH

**Friday, 7<sup>th</sup> October** Our trustees and management hosted a Raas- Garba event on the occasion of Sharad Purnima to celebrate the final and permanent ICSE affiliation for the staff and students followed by the snacks . Best dressed and dancers were awarded with trophies.

**Monday, 3<sup>rd</sup> October** Aarti was performed on the divine occasion of Durgashtami. Like every year, we began admission form distribution for the academic year 2023-24.

**Tuesday, 11<sup>th</sup> October** SOF General Knowledge (GK) Olympiad was conducted for the students for Grade 1 to 10.

**Tuesday, 11<sup>th</sup> October & Wednesday, 12<sup>th</sup> October** Health Fiesta Phase 3-Eye and Dental Check up was organised for all students.

**Monday, 10<sup>th</sup> October** A session was conducted by the counselors for Grade 7 to 10 on the event of World Mental Health Day.

**Monday, 17<sup>th</sup> October** A session for “India’s International Movement to Unite Nations - IIMUN” was conducted for the students of Grade 8 to 10. Director Ms. Sanmi Pawar addressed and briefed the students about the details and benefits of participating in the conference.

**Wednesday, 19<sup>th</sup> October** Students of Grade 2 put up a wonderful show depicting the importance of 5 days of Diwali Celebration. Students celebrated Diwali by sharing and enjoying delicacies and savouries.

**Friday, 14<sup>th</sup> October** SOF English Olympiad (IEO) was conducted for the students for Grade 1 to 10.

**Saturday, 15<sup>th</sup> October** PTM was conducted to give away the 1<sup>st</sup> term assessment report cards to the students of Grade 1 to 5. Papers were shown to the students of Grade 6 to 10. Inter-house Football Competition was organised for the students of Grade 6 to 10.

## Moments of tranquility

All I want is to dissolve into the air, like a pleasant summer breeze:

Or to melt into sea foam and ride the waves;

I just want to be sung away like a Christmas carol: Or just mix into the warmth of a loving hug: I want to blend into the minds of people like a blessed memory -

forgotten, yes, but bringing back feelings worth of centuries.

All I want. All in all,

Is to be at peace Just be me.

Maybe all alone Maybe with a family

I don't want my own happiness I'm far too content for to be selfish But all I want

Is the peace I bring others may it be tranquil and may it fit.

**Maitri Shethia, 10B**

## अनोखा रिश्ता

शिक्षक हमारे गुरु हैं, शिक्षक हमारे भगवान हैं,  
शिक्षक हैं, तो हम अच्छे इंसान हैं।

शिक्षक हमें पढ़ाते हैं, शिक्षक हमें लिखाते हैं,  
रोते-रोते खिलकर हँसना, शिक्षक ही हमें सिखाते हैं।  
शिक्षक ने डाँटा हमें, शिक्षक ने सराहा हमें,  
समय-समय पर शिक्षक ने ही, सुधारा हमें ।

सही राह दिखाया जिसने, सही मार्ग बताया जिसने,  
जीवन को अनुशासन से जीना, हम शिष्यों को सिखाया  
जिसने ।

उनके बिना हम हैं अधूरे, वो हैं तो हम हैं पूरे,  
गुरु के बिना शिष्य नहीं, शिष्य के बिना गुरु नहीं,  
यह रिश्ता अनोखा है, जहाँ प्यार और संस्कार है ।

**Pragati Pandey, 10A**

## HASTA LA VISTA

From crying on the first day to complying till the last,  
From being unknown to being the only one known,  
From those stressful nights to those restless night,  
We are all for one and one for all.

From sharing tiffins to those bickering bray,  
To all those moments where we were prying for a day,  
To all those hearty good morning wishes,  
To the place where you never tasted your own dishes.

From those examinations' hall,  
To all those unities befall,  
From those bus antaksharis to different tournaments,  
To those school programs that were merriment.

From offline to online we have been together,  
Cheers for being there for each other in all weather,  
From making blunders to creating paper crumbles,  
To all those years where you thank your second volunteers.

Today is the day, Today is your last way,  
We welcome you all to the day you can call as your own,  
The place where you dwell,  
We welcome you all to your Farewell.

**Mahi Vedant, 10B**

## A Day By The Mountains

The mountain stands mighty and high,  
So tall they could caress the sky.  
Between them stands a rainbow,  
In which exquisite clouds show.

The valley below-- an enticing view,  
With fragrant Clematis with their pinkish-red hue.  
Attracted to the soil with abundant grass,  
These delicate flowers, grow in mass.

A crystal clear stream rushes between the Sierra,  
And has danced so, for many an era.  
In glistens the morning light,  
It is indeed a marvellous sight.

By the mountains and by the brook,  
No one can help but just look.  
And cherish beauty of this place,  
Which is part of mother Earth's face.

**Chehel Dagaliya, 10A**

## Peer Pressure

By Khyati Bheda, 9A

When talking about the issues of the teenage world, peer pressure cannot be overlooked. This obstacle is encountered by everyone, teenagers not being an exception. Peer pressure and its impression on the mind and lifestyle of a person are not unknown to us. It is, in simple terms, pressurizing your own self so as to fit in with others. We all have friends, colleagues. The people around us greatly influence us. Many a times, this influence has a negative impact. This is reflected by the deteriorating mental health of the teenager. Let's talk examples.

A dialogue from a prominent Bollywood movie, '3 Idiots', goes like this: *"Dost fail ho jaye toh dukh hota hai... Lekin dost first aa jaye toh zyaada dukh hota hai."*

This line very well reflects the effects of peer pressure. Under the impact of this mental illness, one might get depressed or, at times, overburden oneself. One very important message implied by this film is the need to live life lightly and not under the pressure created by the society.

The society might say, *"Life is a race."* But remember, Ralph Waldo Emerson once said: *"To be yourself in a world that is constantly trying to make you something else is the greatest accomplishment."*

So, STAY HAPPY, STAY YOU! You are what you believe yourself to be.

## The Rise of India

By Chehel Dagaliya, 10A

India, in ancient history, was always seen as a country of villages. We were seen as an illiterate, backward country that was entirely dependent on agriculture for our well-being. Britishers, Mughals, Afghans and many dynasties had looted and drained our wealth. Once the country that was known as 'Sone ki chidiya', had been drowned in poverty and literacy. The country today has reached new heights in all fields. The economy of the country today is three trillion and its progressing towards five trillion. The Prime Minister of Britain, Rishi Sunak is an Indian. The CEO of Microsoft and Google, Satya Nadella and Sundar Pichai are Indians. Many of world's best companies are headed by Indians.

Even in military, the country has progressed so much that 'Tejas' fighter jets are best and cheapest fighter jets. India has changed into an export country from an import country. Earlier we used things that were made in other countries but now most of the items are made in India and sold throughout the country as well as exported. Our Prime Minister, Narendra Modi has made it possible. Best doctors and medicines are from India. 'Ayurveda' the best form of healing was practised by Indians and has been spread worldwide. The best university from ancient times, 'Nalanda University' is situated in India. India, even today has best brains and is rising faster. No matter how much the other countries suppress us, we still remain standing and rising. We might get injured but we will never fall because Indians are unstoppable.

## Space News

Scientists from China have built a research facility on "artificial moon". This will enable them to simulate low-gravity environments using magnetism. This setup will consist of 2-foot-diameter (60 centimeters) vacuum chamber filled with rocks and dust to imitate the lunar surface and will use magnetic fields. This will be used to test lunar missions on earth itself before the final launch.

## 5 Interesting Science Facts

### which will astonish you!!

1. Cats have over 100 vocal sounds, whereas dogs only have about ten.
2. Wearing headphones for an hour multiplies the bacteria in your ear by 700.
3. It can rain diamonds on other planets. The atmospheres in Neptune, Uranus, and Saturn have such extreme pressure that they can crystallize carbon atoms and turn them into diamonds.
4. At over 2,000 kilometers long, The Great Barrier Reef is the largest living structure on Earth.
5. The oceans produce the majority of the oxygen on Earth. According to the National Oceanic Service, we can thank plant-based marine organisms for all that fresh air. More than half of the world's oxygen is produced by plankton, seaweed, and other photo synthesizers.

## The Collatz Conjecture

1. Think of any positive integer of your choice.
2. Check if the number selected is odd or even.
3. If it's even, divide by 2.
4. If it's odd, multiply it by 3 and add 1.
5. Repeat the said steps to obtain the next number in the sequence and move on.
6. See where the sequence ends.

For e.g.

The number selected is 7, since its odd follow step 4, so you get 22. Now since the number is even follow step 3, so you get 11, again you get odd number so follow step 4 and so on. The following sequence

will be:

7, 22, 11, 34, 17, 52, 26, 13, 40, 20, 10, 5, 16, 8, 4, 2, 1, 4, 2, 1.. isn't it amazing.

Try with some other positive integer.

# Me, Mic and Media

by Shantanu Joshi

I am delighted to connect with you on this new platform. You have always heard me in class or seen me on screen. 'Reading' me is a little different experience. But hey, can you hear me while you read this... It's almost like I am talking to you, right? To share frankly, I am feeling 'chill' while writing! Talking is a difficult job. You cannot delete what you have spoken... You have no time to predict the reaction of the person you are talking to. You have to instantly reply... cannot think for long. Long pauses have many other meanings. Imagine the hero asks the heroine, “Mujhse shaadi karogi?” and then she is standing there thinking... Hero gets the answer even without an answer! You also have to use the right pitch and volume otherwise the meaning changes. “Jaao beta jara araam karlo. Tum thak gaye honge na?” This statement by your mother means something else which said in different pitch and volume. Sometimes you wanted to sound smart but it happens to sound ‘over smart’ because of your voice modulation. Clarity of speech and the right speed matter too. You say “Bhaiyya, ek khali plate dena” and the waiter hears it as -“bhaiyya, ek Thalipeeth dena.”

Talking is such a complex job, do you agree? And we all do it every day. We sometimes do so well that win many hearts or sometimes fail miserably when we hurt our people.

Communication is power! If you are blessed with the art of talking then you surely enjoy it more. Others like me had to learn it with effort. Being an introvert and always shy to talk to making a career in the field of talking, is quite an interesting journey. I have decided to share some of my observations and learning from the field of communication. How leaders use the power of communication to make a change in the world, How big brands are made, what techniques do they use to build trust and earn money, What techniques influencers use so you want to hear and follow them, how do some people attract more people and have lots of friends... You may not only enjoy reading it but also find it useful to apply in your life. Do follow my articles series in the next edition of this newsletter. I also welcome your suggestions and keen to hear your experiences if you have used any specific communication technique to solve any problem in your life. Chalo, Got to go! My cat is communicating in meow meow language that she needs food. bye bye!
